```java
1  package net.board.action;
2
3  public class ActionForward {
4      private boolean isRedirect=false;
5      private String path=null;
6
7      public boolean isRedirect(){
8          return isRedirect;
9      }
10
11     public String getPath(){
12         return path;
13     }
14
15     public void setRedirect(boolean b){
16         isRedirect=b;
17     }
18
19     public void setPath(String string){
20         path=string;
21     }
22 }
```
